EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment for claim 1 and the specification was given in a telephone interview with Steve Kahm on 09/13/2007.

The application has been amended as follows:

Election/Restrictions

Claims 1-11 are allowable. The restriction requirement between species, as set forth in the Office action mailed on 03/29/2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 4-11, directed to a non-elected species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

To the claims

-- Claim 1: A rebar spacer comprising,

one clip having a bottom portion with a semicircular rebar cradling portion,
a pair of columns one on either side of the semicircular rebar cradling
portion and extending upward therefrom,

a cross portion on each column extending toward the opposing column,
a straight arm extending angularly downward from each cross portion
toward the axis of the radius of the semicircular rebar cradling portion and having
an end proximate a rebar placed in the cradling portion,

a shoulder portion on each side of the semicircular rebar cradling portion,
between the semicircular rebar cradling portion and the columns, each shoulder
portion having a width to allow the arm to be substantially recessed over the
shoulder,

a base portion attached to the base of the clip for supporting the clip at a
desired height, the clip being centered over the middle of the length and width of
the base portion. --

Claim 5

In line 1 change "wherein" to --including --

In line 2 change "center" - -a center --

Art Unit: 3635

Claim 6

In line 2 change "The" to - -the- -

To the specification

The specification, page 5, line 4, change "angle 19 until" to - -angle 19, allowing the arm to be substantially recessed over the plane 17, until- -

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art does not disclose a rebar spacer as claimed having a shoulder with sufficient width to allow the arm to be substantially recessed over the shoulder thereby allowing the arms to recessed sufficiently to provide for easy insertion and removal of an inserted rebar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
